

Introducing the UCM6200 series

The UCM6200 series includes the same award-winning features as the UCM6100 series. The same industry-leading platform that we designed for the UCM6100 series, which continues to be enhanced month by month with more and more features and functionalities, will be extended to the UCM6200 series. Looking for a more powerful upgrade? We have redesigned our 8 FXO port model, the UCM6208, to offer the ability to support more users and more concurrent calls, as it support up to 800 users and up to 100 concurrent calls.

DHCP

All UCM6200 series models include a built-in DHCP server to make setting up and managing networks quicker and easier

1. Switched 2. Dual Network 3. Router

All UCM6200 series models support 3 modes: Switched, Dual Network and Router, to offer businesses the ability to customize the design of their network

UCM6208 Enhancements

**800
users**

The UCM6208 supports almost double the amount of users as the UCM6100 series, up to 800 users

The UCM6208 supports more concurrent calls than the UCM6108, supporting 100 concurrent calls

Gigabit

We have added an extra Gigabit port to the 8 FXO port version, the UCM6208, to increase networking capacity

UCM6200 series vs. UCM6100 series

	UCM6102	UCM6104	UCM6108	UCM6202	UCM6204	UCM6208
Gigabit Ports	2	2	1	2	2	2
